

High Sage Endurance Ride 2017

You're invited to our fifth year event high above Cache Creek and based in a broad natural meadow. Trail is mostly two track forest road; most seldom used, some short sections well-travelled, most inclines are gradual, lots of flat going.

Camp water provided for horses Friday, June 2. There is very limited opportunity for high-lining in this meadow site, ground is gently sloped. Lots of room to manoeuvre. Manure and unused feed to be spread. Dogs to be leashed or contained.

Please note that this early ride date exposes Larkspur in the meadow, which can be toxic to animals, including horses.

Larkspur Toxic Principles: Diterpene alkaloids

Clinical Signs: Unless there is a lack of suitable forage, horses typically do not consume toxic amounts of larkspur. The toxicity of the plant may vary depending on seasonal changes and field conditions; as the plant matures, it generally becomes less toxic.

Limited cell service on site; for **Ride Entry cancellation**, call/text/voice mail **250 256 1795** – email junemelhuish@gmail.com Full refund available for calls/emails placed by 3pm Friday, June 2.

Ride Management – Scott Hudson

Schedule of Events
